

Logistics Park Phoenix Newsletter: Tracking for Success

50,000 Jobs, Billions in Impact

Arizona is one of the fastest-growing economic hubs in the Southwest, attracting industries from across the country and around the world. Companies are choosing Arizona for its strong business advantages, and we're proud to be part of that growth. As a community partner, we're committed to developing critical infrastructure—like Logistics Park Phoenix—that supports businesses, strengthens supply chains, and creates high-paying, sustainable jobs.

This facility will bring immediate and long-term economic benefits to the region. Here's what that impact looks like:

- 26,000+ jobs created during construction
- \$1.4 billion in labor income during construction
- 50,000+ jobs supported annually once completed
- \$2.5 billion in annual labor income
- \$258 million in annual state and local tax revenue for schools, emergency services, and other community needs

With projects like this, we're helping drive Arizona's future—creating opportunities, strengthening communities, and supporting the state's continued growth.

Good for AZ, Great for the Planet

Freight rail plays a huge role in Arizona's economy. It moves the goods that families and businesses rely on every day—everything from food and clothing to building materials and electronics.

But the benefits don't stop there. Improving Arizona's rail network also helps the environment. More rail capacity means fewer trucks on the road, which means less traffic, lower fuel use, and reduced emissions. Here's something you might not know: trains can move a ton of freight nearly 500 miles on just one gallon of diesel. That makes freight rail the most environmentally friendly way to move goods over land. In fact, switching from trucks to trains can cut greenhouse gas emissions by up to 75%.

That's just one more reason to be excited about Logistics Park Phoenix. This new project will boost Arizona's freight rail capabilities—great news for both businesses and the planet.
